

# Circles on a circle

Find all the circles in this picture and colour them in!

They all have the same size, radius 4.5cm

In these pictures the radius is 2cm

# Cardioid

The little dots are at the centres of the circles. The circles are drawn so they all have a point in common

Can you see which dot is at the centre of which circle?

Colour the picture in!

the "apple" shape round the edge is called a "cardioid"

Colour a cardioid!

Draw a cardioid! Complete this picture, using the instructions below. Make your own on blank paper.

## Instructions

1. Put the point of a compass at point 1. Put the pencil tip at the "top" point, and draw a circle

2. Put the point of a compass at the other point 1 and repeat

3. Now add circles centred at points 2, also passing through the top. Keep on going, drawing circles centred at each dot. Two are already drawn for you
